Submission Date: 31 July 2026

Day 1 – First Aid Orientation Session

Proof of Participation

Session Overview

The first session of Week 3 of the Alkhidmat Summer Internship Program 2026 focused on **First Aid Orientation**. The session was conducted by trainers from the **Pakistan Red Crescent Society (Punjab)**, including **Warda Mehmood, M. Imran Latif, Zeeshan Shafiq, and Sara Nadeem**. The trainers explained the importance of first aid, emergency preparedness, and the responsibility of volunteers in helping people during accidents and medical emergencies. The session included both theoretical concepts and practical demonstrations of basic first aid techniques.

Key Topics Covered

- Introduction to First Aid and its importance in saving lives.
- Responsibilities and qualities of a first responder.

- Importance of remaining calm and confident during emergencies.
- The **DRABC** approach (Danger, Response, Airway, Breathing, and Circulation) for assessing a casualty.
- Airway management using the **Head Tilt–Chin Lift** technique.
- Checking breathing using the **Look, Listen, and Feel** method.
- Recovery Position for unconscious but breathing casualties.
- Basic **CPR (Cardiopulmonary Resuscitation)** techniques and when it should be performed.
- Differences between CPR procedures for adults, children, and infants.
- Personal safety measures before assisting an injured person.
- Role of the Pakistan Red Crescent Society in emergency response and humanitarian services.
- Importance of volunteerism and serving humanity through first aid knowledge.

Important Takeaways

- First aid is the immediate care given before professional medical help arrives.
- A calm and confident response can save lives during emergencies.
- Personal safety should always come first before helping others.
- Following the DRABC protocol helps assess a casualty in a systematic way.
- Every volunteer should have basic first aid knowledge to support their family and community.
- Practical first aid skills are useful not only during disasters but also in everyday life.

My Learnings

This session taught me that first aid is a valuable life skill that everyone should learn. I gained knowledge about assessing emergency situations, checking a casualty's condition, maintaining an open airway, and understanding the basic principles of CPR. I also learned that staying calm, thinking clearly, and following the correct procedures can greatly improve the chances of helping someone before medical professionals arrive. The practical demonstrations made the concepts easier to understand and showed how these skills can be applied in real-life situations.

Outcomes

After attending this session, I developed a better understanding of emergency response procedures and the importance of first aid in daily life. I became more aware of the responsibilities of a volunteer during emergencies and realized how simple actions can make a significant difference in saving lives. This session also motivated me to continue learning practical skills that can benefit both my community and my personal development.

Assignment Work

No assignment was assigned for this session.

Day 2 – Disaster Management & Emergency Response Training

Proof of Participation

Session Overview

The second day of Week 3 focused on **Disaster Management and Emergency Response Training**. The session was a practical continuation of the previous day's first aid training. The trainers from the **Pakistan Red Crescent Society** demonstrated different rescue techniques, emergency response methods, fire safety measures, and disaster preparedness. The session mainly focused on preparing interns to become responsible first responders who can help people during emergencies until professional medical assistance arrives. A special motivational talk was also delivered by **Dr. Saeed Elahi**, Former Health Minister of Punjab.

Key Topics Covered

Topic 1: Practical First Aid & CPR

The trainers practically demonstrated CPR techniques, patient assessment, bandaging methods, and how a first responder should stabilize an injured person before medical help arrives.

Topic 2: Disaster Preparedness & Rescue Techniques

Different rescue methods were explained, including evacuation procedures, Firefighter Carry, creating an improvised stretcher using available materials, and safely transporting injured people during emergencies.

Topic 3: Fire Safety & Water Rescue

The trainers explained different types of fires, the correct use of fire extinguishers, and basic water rescue awareness. They also highlighted the importance of using Personal Protective Equipment (PPE) while responding to emergencies.

Topic 4: Snakebite & Medical Emergencies

The session discussed common myths about snakebites and explained the correct first aid procedures. The trainers also explained how to manage nosebleeds and other minor emergencies safely.

Topic 5: Guest Session

Dr. Saeed Elahi (Former Health Minister of Punjab) joined the session and shared the importance of volunteerism, disaster preparedness, and first aid knowledge. He emphasized that the **first 10 minutes after an emergency are very important** and encouraged every intern to spread these life-saving skills within their family and community.

My Learnings

This session helped me understand that disaster management is not only about providing first aid but also about responding wisely during emergencies. I learned different rescue techniques, the importance of patient assessment, and how to safely help injured people before professional medical teams arrive. I also learned that staying calm, using the correct techniques, and avoiding common mistakes can help save lives during emergencies.

Outcomes

After attending this session, I developed a better understanding of emergency response and disaster management. I became familiar with practical rescue techniques, fire safety, and first responder responsibilities. The session also increased my confidence and motivated me to continue learning skills that can help me serve my community during emergencies.

Assignment Work

No assignment was given for Day 2.
