9	Yes	Fashion/lifestyle e-commerce	Marketing/customer reach	Tried online earning	Digital marketing
10	Yes	Software/SaaS product	Funding & mentorship	Not tried, interested	Business/startup development

2. ONE-PAGE REPORT

Youth Entrepreneurship Insights – Hyderabad 2026

Survey Overview

A survey was conducted among **10 students and young graduates** to understand their interest in entrepreneurship, preferred business areas, major challenges, experience with freelancing/online earning, and training needs. The survey used the five questions provided in the GEN Z Entrepreneurship Initiative.

Key Findings

The responses showed a generally positive interest in entrepreneurship. Young people were interested in both traditional and digital businesses, with **AI/software, EdTech, e-commerce and digital services** appearing as notable areas of interest. However, respondents also highlighted difficulties in finding the right business direction, securing funding, gaining practical experience and reaching customers.

3 Promising Startup Ideas

1. AI & Software Solutions

AI services, SaaS products, automation and software solutions can allow technically skilled youth to build businesses around their skills.

2. EdTech & Digital Learning

Online tutoring, AI study tools and digital learning platforms can address problems experienced by students.

3. E-commerce & Digital Brands

Online clothing, fashion, lifestyle and niche-product businesses provide young entrepreneurs with opportunities to start and grow digitally.

3 Common Challenges

1. Lack of Business Knowledge & Direction

Young people may have useful skills but lack knowledge about idea validation, customers, pricing and business models.

2. Limited Funding

Lack of startup capital can prevent young entrepreneurs from developing, marketing and expanding their ideas.

3. Lack of Practical Experience & Mentorship

Young entrepreneurs need more guidance in marketing, sales, customer acquisition and turning an idea into a viable business.

3 Recommendations

1. Practical Entrepreneurship Training

Provide training in idea validation, market research, business models, digital marketing, finance and pitching.

2. Mentorship & Guidance

Connect students and young graduates with experienced entrepreneurs and industry professionals.

3. Funding & Market Access

Provide opportunities through startup competitions, incubation, financing and connections with potential customers.

Conclusion

The survey indicates that young people have a strong interest in entrepreneurship but often need **direction, practical knowledge, mentorship and financial support** to move from an idea to an actual business. Supporting these areas can help strengthen entrepreneurship culture among Pakistani youth.

Respondents: 10 students/young graduates

Location: Hyderabad, Pakistan
